

# Customer Value & Financial Performance

Monthly Revenue and Growth Trend Chart

The platform maintains a solid financial foundation with \$36M in total revenue and a projected 12-month forecast of \$15.7M, alongside an average customer lifetime value of \$7.2K. However, customer retention requires attention, marked by a 13.12% churn rate and 652 active accounts currently flagged as at risk. Meanwhile, monthly performance displays healthy transactional momentum, highlighted by an early revenue growth spike before stabilizing into a steady, predictable trajectory.
